# CSR Material Topics

In 2019, we conducted a comprehensive materiality assessment, in accordance with the Global Reporting Initiative (GRI) Standards, to reflect our growing business, strategy and stakeholder expectations. The assessment

evaluated the 23 topics from our materiality assessment in 2017. Additionally, it reflected our Aetna integration activities through internal and external stakeholder feedback, competitive benchmarking, an industry landscape and assessment

of emerging issues. Ultimately, the 2019 materiality assessment drove the development of our Transform Health 2030 strategy and its pillars: *Healthy People, Healthy Community, Healthy Business and Healthy Planet*.

# Methodology and Findings

---

## **Step One – Identification:**

Through external research, competitive benchmarking and a thorough review of internal documents, we identified 90 material topics of importance to stakeholders and which CVS Health® has an impact on.

## **Step Two – Engagement:**

We conducted a series of interviews with relevant and credible external stakeholder groups for feedback on existing material topics and CVS Health’s CSR strategy. We also reviewed investor feedback to capture their point of view on the expected level of action and transparency related to specific topics.

## **Step Three – Issue Prioritization:**

Using the information gathered in Steps One and Two, we developed a customized and weighted formula to generate and refine a materiality matrix, prioritizing material topics along an “X” and “Y” axis. This formula enabled us to narrow our initial list of 90 material topics down to the 28 topics that are pictured in the materiality matrix. The prioritized list reflects topics where CVS Health has significant impact, or which influence the decisions of stakeholders.

## **Step Four – Review and Finalization:**

Following the prioritization and plotting of the material issues in a matrix, a working session with the CVS Health CSR team provided an opportunity to review, adjust and finalize the material topics. In this step, we also consolidated some of the terms and pillar areas to position topics in a way that makes sense for our business and stakeholders.

Our efforts include expanding preventive care and treatment for chronic conditions such as End-Stage Renal Disease (ESRD), improving medication adherence, coordinating care across the health care system, engaging patients where they are and offering healthier product options at our stores.

Colleagues with direct oversight of areas within our four CSR pillars are responsible for driving performance and meeting established targets as part of their business plan. These internal partners are regularly engaged by the CSR team to provide progress updates and identify emerging risks and opportunities.</p>

We also believe we have an opportunity, and a responsibility, to think about the messages we send to our customers and how these messages impact customer health. That is why we made a commitment to not materially alter the beauty imagery we create for our stores, marketing materials, websites, apps or social media. To support this initiative, we introduced the CVS Beauty Mark, a watermark that appears on imagery that is authentic and has not been materially altered. We are also working with brand partners to ensure that any imagery they use that has been altered is visibly labeled as such.</p>

## Water Use Intensity Measurement 2017–2019

Year	Total Water Usage (ML)	SF of Retail Space (Millions)	Normalized Water Usage (Per Square Foot of Retail Space in ML)
2017	5,554	79.5	0.000072
2018	5,639	80.4	0.00007
2019	6,081	109.6	0.000056

In 2019, our water usage per square foot of retail space increased by 3 percent, and our total water use increased by eight percent from 2018 due to an increase in our store footprint and more extensive data collection which enhanced our ability to capture our water footprint. Through water efficiency measures, total water use per square foot has decreased 31 percent from the 2010 baseline.
